

## **Lytera® 2.0 Pigment Correcting Serum**

This prescription strength anti-aging product lightens existing dark spots as it prevents further skin discoloration for brighter, more luminous skin in a simple, easy to use professional system.

Improves the visible signs of skin aging with minimal irritation:

- Hyperpigmentation
- Melasma
- Photodamage
- Fine lines
- Wrinkles
- Sallowness

Recommended Uses:

AM:

1. After cleansing, apply Lytera® 2.0 Pigment Correcting Serum to affected areas as directed by Dr. Lee.
2. Apply a moisturizer with sunscreen (preferably SkinMedica Total Defense and Repair SPF 34) liberally to the face and neck in the morning or before sun exposure and as needed. It is important to avoid sun exposure as much as possible while using this system to help prevent pigmentation from reoccurring.

PM:

3. After cleansing, apply Lytera®2.0 Pigment Correcting Serum to affected areas as directed by Dr. Lee.

*Do not use Lytera® skin brightening complex if you are pregnant, lactating, or planning to become pregnant. Avoid getting in eyes. If contact occurs, rinse eyes thoroughly with water.*
