

Lytera® Skin Brightening System

This prescription strength anti-aging regimen lightens existing dark spots as it prevents further skin discoloration for brighter, more luminous skin in a simple, easy to use, minimally skin-irritating professional system.

Improves the visible signs of skin aging with minimal irritation:

- Hyperpigmentation
- Melasma
- Photodamage
- Fine lines
- Wrinkles
- Sallowness

Recommended Uses:

AM:

1. After cleansing with AHA/BHA Exfoliating Cleanser, apply Lytera® skin brightening complex to affected areas as directed by Dr. Lee.
2. Apply sunscreen liberally to the face and neck in the morning or before sun exposure and as needed. It is important to avoid sun exposure as much as possible while using this system to help prevent pigmentation from reoccurring. We recommend using TOTAL DEFENSE + REPAIR SPF34 as your sunscreen.

PM:

1. After cleansing with AHA/BHA Exfoliating Cleanser, apply Lytera® skin brightening complex to affected areas as directed by Dr. Lee.
2. Apply a single pump of Retinol Complex 0.5 to face, neck and décolleté.

Do not use Retinol Complex 0.5 if you are pregnant, lactating, or planning to become pregnant. Avoid getting in eyes. If contact occurs, rinse eyes thoroughly with water.
